

Product Owner Persona Development

Written by Brian McCarthy

Persona of Jeremy Harris

Field	Details
Persona Name	Jeremy Harris
Role	Manufacturing department manager
Experience	15+ years in manufacturing management, with a focus on optimizing production and inventory processes. Experienced in leading cross-functional teams and implementing operational improvements.
Key Drivers	• Streamlining operations for efficiency • Reducing costs while maintaining high quality • Improving employee satisfaction and minimizing complaints • Adopting modern technologies to replace outdated systems
Key Skills	• Leadership and team management • Operational analysis and decision-making • Knowledge of manufacturing best practices • Communication and conflict resolution
Primary Stakeholders	• Production teams • Inventory and logistics staff • Senior leadership (e.g., plant directors, executives) • Vendors and suppliers
Role Overview	Jeremy is responsible for ensuring smooth operations in the manufacturing department, addressing inefficiencies, and meeting production goals. He manages inventory systems, addresses workforce concerns, and liaises with other departments to align objectives.
Key Tasks	• Overseeing daily manufacturing operations • Reviewing and improving inventory management systems • Addressing inefficiencies in transportation and logistics • Monitoring and resolving inventory outages • Responding to internal complaints and ensuring employee satisfaction
Goals	• Implement modern inventory management systems within six months • Reduce inventory outages by 50% in the next quarter • Decrease transportation lead time for inventory delivery by 30% • Increase employee satisfaction scores through improved processes

Field	Details
Challenges	• Managing resistance to change from employees accustomed to manual processes • Navigating budget constraints while modernizing systems • Ensuring cross-departmental alignment on inventory practices • Addressing frequent internal complaints without disrupting operations
