Persona Development

Field	Content
Persona Name	Jeremy Harris
Role	Manufacturing Department Manager at AutoPro Solutions Inc.
Experience	Jeremy is a seasoned manufacturing management professional with more than 15 years of experience leading cross-functional teams, optimizing production workflows, improving inventory processes, and supporting modernization initiatives within manufacturing environments.
Key Drivers	Jeremy is motivated by streamlining operations, reducing costs, maintaining high-quality production standards, improving employee satisfaction, addressing internal complaints effectively, and helping AutoPro achieve measurable operational improvements.
Key Skills	Leadership, team management, operational analysis, inventory optimization, manufacturing best practices, communication, conflict resolution, stakeholder collaboration, logistics coordination, and data-driven decision-making.
Primary Stakeholders	Production teams, inventory staff, logistics teams, warehouse supervisors, department leaders, senior leadership, vendors, suppliers, and external automotive clients who rely on timely delivery of parts.
Role Overview	Jeremy oversees daily manufacturing operations and ensures the manufacturing department runs smoothly. He manages inventory systems, addresses workforce concerns, resolves operational inefficiencies, supports production goals, and aligns department objectives with broader company priorities.
Key Tasks	Oversee daily production operations; monitor and improve inventory systems; identify transportation and logistics inefficiencies; resolve inventory outages; respond to employee and stakeholder complaints; coordinate with vendors and suppliers; collaborate with other departments; review performance data; and support implementation of modernized systems.
Goals	Modernize inventory systems within six months; reduce stock outages by 50%; reduce transportation lead times by 30%; improve employee satisfaction through clearer communication and more efficient processes; and maintain reliable production performance during system modernization.
Challenges	Jeremy faces resistance to change from employees accustomed to manual processes, budget limitations, frequent internal complaints, transportation delays, inventory outages, integration complexity, and the need to coordinate priorities across departments without disrupting manufacturing operations.
