

Product Owner Release Plan

Written by Brian McCarthy

Sprint 1: Foundation Setup - 10 Story Points

Field	Content
User Story 10	As a system administrator, I want to upgrade the existing ERP system to allow for integration with the new inventory management platform so that data flows seamlessly across systems. Story Points: 2. Priority: 4. Dependency: Required before implementing User Story 1.
User Story 1	As a manufacturing manager, I want an AI-driven inventory management system to automate inventory tracking so that I can reduce manual errors and streamline operations. Story Points: 8. Priority: 1. Dependency: Relies on completion of User Story 10.

Sprint 2: Transportation and Alerts - 10 Story Points

Field	Content
User Story 2	As a logistics coordinator, I want a real-time transportation tracking system so that I can ensure timely and efficient delivery of inventory to production teams. Story Points: 6. Priority: 2. Dependency: Independent but high priority due to transportation efficiency impact.
User Story 6	As a production team member, I want mobile notifications for critical inventory updates so that I can address urgent issues immediately without delay. Story Points: 3. Priority: 6. Dependency: Independent and can be completed concurrently with User Story 2.
User Story 9	As a team lead, I want AI training sessions for my team so that they can effectively use the new inventory management and analytics systems. Story Points: 1. Priority: 7. Dependency: Independent; planned after User Stories 2 and 6 are done.

Sprint 3: Efficiency and Analytics - 10 Story Points

Field	Content
User Story 3	As a warehouse supervisor, I want an early-warning system for inventory shortages so that I can address potential outages before they impact production schedules. Story Points: 5. Priority: 3. Dependency: Requires completion of User Story 1.
User Story 7	As an operations manager, I want a performance analytics tool integrated into the inventory system so that I can identify inefficiencies and improve processes. Story Points: 4. Priority: 5. Dependency: Requires User Story 1 and can be completed concurrently with User Story 3.
User Story 8A	As a department leader, I want a feedback collection system from employees about the new systems so that I can address concerns and improve team satisfaction. Story Points: 1. Priority: 9. Dependency: First split deliverable; dependent upon completion of User Stories 3 and 7.

Sprint 4: Final Integration and Stakeholder Needs - 10 Story Points

Field	Content
User Story 4	As a team member in manufacturing, I want an integrated dashboard to view inventory levels and transportation updates in real time so that I can plan production activities more effectively. Story Points: 5. Priority: 8. Dependency: Requires completion of all prior user stories.
User Story 5	As a vendor, I want an automated order scheduling system integrated with AutoPro's platform so that I can reduce delays and ensure smooth collaboration. Story Points: 4. Priority: 10. Dependency: Can be accomplished concurrently with User Story 4.
User Story 8B	As a department leader, I want the final feedback collection deliverable completed so that employee concerns can be addressed after full integration. Story Points: 1. Priority: 11. Dependency: Final split deliverable; dependent upon completion of User Stories 4 and 5.
