

# Ethical and Bias Analysis Worksheet

Completed product-manager worksheet for Tasks 2-5

**Purpose:** Identify biased or ethically problematic language in two product descriptions, then rewrite each description so that it remains persuasive, inclusive, accurate, and responsible.

## Task 2 and Task 3: Product Description 1 - EcoCleanse Juicer

### Original Product Description 1

Our latest product, the EcoCleanse Juicer, is undoubtedly the best juicer on the market. It's designed exclusively for those who understand the importance of health and are smart enough to invest in their well-being. Unlike other juicers, the EcoCleanse Juicer preserves 100% of the nutrients, ensuring that only the most intelligent consumers can maintain their health in today's polluted world. Our product is not just a juicer; it's a lifestyle choice for the educated elite who want to live longer and outshine the average person.

| Biased / Ethical Verbiage                                  | Concern Type                           | Why It Is a Concern                                                                                     | Recommended Correction                                                                      |
|------------------------------------------------------------|----------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| "undoubtedly the best juicer on the market"                | Unsupported superiority claim          | This absolute claim may be misleading unless it is supported by credible comparative evidence.          | Use evidence-based wording such as "designed to support fresh juicing at home."             |
| "exclusively for those ... smart enough"                   | Exclusionary and insulting language    | It implies that people who do not buy the product are unintelligent or less health-conscious.           | Make the audience broad and inclusive: "for people seeking convenient fresh juice options." |
| "preserves 100% of the nutrients"                          | Potentially false health claim         | A 100% nutrient-preservation claim is difficult to prove and could create regulatory or trust concerns. | Use qualified wording: "aims to retain a high percentage of nutrients."                     |
| "only the most intelligent consumers" and "educated elite" | Class-based bias and elitism           | The wording creates superiority and class bias, alienating many potential customers.                    | Focus on product benefits rather than social status or intelligence.                        |
| "live longer and outshine the average person"              | Unsubstantiated health/longevity claim | Suggests guaranteed health outcomes that may not be supported by evidence.                              | State that the product can be part of a balanced lifestyle, not a guarantee of outcomes.    |

### Bias-Free and Ethical Rewrite

The EcoCleanse Juicer is designed to support a balanced, health-conscious lifestyle by helping users prepare fresh fruit and vegetable juices at home. The product uses an efficient extraction process intended to retain important nutrients while offering an easy-to-use design for a wide range of consumers. EcoCleanse is positioned as a practical option for people who want convenient access to fresh juices as part of an overall wellness routine.

# Ethical and Bias Analysis Worksheet

Completed product-manager worksheet for Tasks 2-5

## Task 4 and Task 5: Product Description 2 - SmartSaver Financial App

### Original Product Description 2

The SmartSaver Financial App is the only sensible choice for anyone who truly values their hard-earned money. It's the preferred app among the wealthy and successful, as it's designed for those who are wise enough to seek prosperity. SmartSaver users are known to be more affluent and financially savvy than the average person, as they utilize exclusive features that lesser apps simply don't offer. Additionally, SmartSaver proudly uses advanced algorithms to predict and influence market trends, giving our users an unmatched advantage in the financial world.

| Biased / Ethical Verbiage                                       | Concern Type                              | Why It Is a Concern                                                                                                | Recommended Correction                                                                                |
|-----------------------------------------------------------------|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| "the only sensible choice"                                      | Unsupported exclusivity claim             | The wording overstates the app and dismisses alternative financial tools without evidence.                         | Describe specific capabilities such as budgeting, tracking, and planning tools.                       |
| "preferred app among the wealthy and successful"                | Socioeconomic bias                        | It frames the app as intended for wealthier users and excludes users with different financial backgrounds.         | Use inclusive language: "available for anyone interested in financial management tools."              |
| "wise enough to seek prosperity"                                | Judgmental language                       | It implies people who do not use the app are unwise or financially irresponsible.                                  | Focus on empowering users without judging their intelligence or financial status.                     |
| "users are known to be more affluent and financially savvy"     | Unsupported user stereotype               | The phrase makes broad claims about users and reinforces class-based assumptions.                                  | Say the app helps users build financial awareness and organization.                                   |
| "predict and influence market trends" and "unmatched advantage" | Misleading financial claim / ethical risk | This could imply market manipulation or guaranteed investment advantage, which is risky and potentially deceptive. | Clarify that the app analyzes general trends and should be used with caution and professional advice. |

### Bias-Free and Ethical Rewrite

The SmartSaver Financial App provides accessible tools for budgeting, savings tracking, spending insights, and personal financial planning. Its data-analysis features can help users review general market trends and make more informed financial decisions, while reminding users that app-generated insights are educational and should not replace professional financial advice. SmartSaver is designed for anyone interested in improving financial organization and financial literacy.

# Ethical and Bias Analysis Comparison

Tasks 6-7: Peer validity review and comparison to potential solution

## Task 6: Friend or Associate Review - Validity of Analysis

### Summary of review feedback:

- The analysis is valid because it identifies both biased language and ethical risk, rather than focusing only on tone. The original descriptions use superiority language, class-based assumptions, and claims that may mislead customers.
- The rewritten descriptions preserve the value of the products while avoiding unsupported claims. The EcoCleanse rewrite still promotes wellness and convenient fresh juice preparation, but it no longer guarantees 100% nutrient retention or suggests that only intelligent or elite customers should buy it.
- The SmartSaver rewrite is more responsible because it describes budgeting, savings tracking, spending insights, and trend analysis without implying guaranteed financial advantage or market influence. The revised wording also makes the app accessible to a broader audience.
- The analysis could be strengthened by adding a formal review step before launch, including legal review for health and financial claims and product-marketing review for inclusive language.

## Task 7: Comparison to the Ethical and Bias Analysis Solution Document

| Area Compared                                  | This Analysis                                                                                                                   | Potential Solution Document                                                                                     | Result                                                   |
|------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| Product Description 1 - superiority claim      | Identifies "best juicer" as an unsupported superiority claim.                                                                   | Also identifies "undoubtedly the best juicer on the market" as biased language.                                 | Aligned.                                                 |
| Product Description 1 - intelligence / elitism | Flags "smart enough," "most intelligent," and "educated elite" as exclusionary, elitist, and class-biased.                      | Also flags the suggestion that only smart or educated elite individuals choose the product.                     | Aligned, with additional detail.                         |
| Product Description 1 - nutrient claim         | Flags "preserves 100% of the nutrients" as a potentially false health claim.                                                    | Also notes that 100% nutrient preservation may not be scientifically proven.                                    | Aligned.                                                 |
| Product Description 2 - socioeconomic bias     | Flags wealthy/successful and affluent user language as socioeconomic bias.                                                      | Also identifies that the app is framed as only for the wealthy and successful.                                  | Aligned.                                                 |
| Product Description 2 - financial ethics       | Flags "predict and influence market trends" as misleading and potentially implying market manipulation or guaranteed advantage. | Also flags the claim as misleading and potentially manipulative if taken at face value.                         | Aligned.                                                 |
| Rewrite comparison                             | Uses inclusive, qualified, benefit-oriented language and advises caution with financial trend insights.                         | Uses similar inclusive wording and says financial insights should be used with caution and professional advice. | Aligned; this version adds more product-manager framing. |

## Conclusion

Overall, this analysis closely matches the potential solution. The main difference is that this version provides more detailed product-management recommendations, including safer replacement wording and a stronger emphasis on substantiation, inclusivity, and regulatory caution before marketing copy is released.
